SUMMARY

eJPTv2 certified (INE, Jan 2025), eWPTX in progress. Web application testing is the focus: WSTG-mapped write-ups on public bug-bounty programs, a security pass on a production ride-hailing platform whose code I also maintain, and a KFUPM CTF team lead. Computer Engineering senior at KFUPM, graduating December 2026, seeking a penetration testing or security analyst role.

CERTIFICATIONS

- **eJPTv2**: INE Junior Penetration Tester, earned Jan 2025 `verify: certs.ine.com/e5c12a68...`
- **eWPTX**: INE Web Application Penetration Tester eXtreme, in progress
- **PCEP**: Certified Entry-Level Python Programmer
- CompTIA Security+, Network+, A+ and Cisco CCNA: coursework complete, exams pending

SECURITY EXPERIENCE

Bug Bounty Hunter (independent)

2025 – 2026

HackerOne · Bugcrowd · BugBounty.sa

Remote

- Tested public programs on HackerOne, Bugcrowd and BugBounty.sa after training on INE eWPTX labs (authentication and SSO attacks; advanced web application pentesting), PortSwigger Web Security Academy, Hack The Box and TryHackMe.
- Worked each program from scope review through reconnaissance and testing against the OWASP Web Security Testing Guide checklist to a write-up mapped to WSTG test IDs.
- Automated the repetitive half of reconnaissance with a personal Python and Bash toolkit: a subdomain enumeration pipeline, endpoint and JavaScript discovery, scheduled asset-change monitoring, and report templating mapped to the OWASP WSTG.

PROJECTS

Journey Joy

RIDE-HAILING · SECURITY

Authorized security work on a production ride-hailing platform (Node/Express, React, Flutter) whose code I also maintain: the backdoor, IDOR and path-traversal fixes and the hardening are itemized under Freelance Software Engineer, and every fix is deployed to the production backend.

KFUPM CTF, 3rd place

SECURITY · TEAM LEAD

Led the team through the web and network exploitation challenges with Wireshark, Metasploit and Nmap.

Al Rugaib Sales Platform

MOBILE · PRODUCTION

Flutter/Dart superapp for H. M. Al Rugaib & Sons: orders, catalog, quotations written into Dynamics 365, analytics, bonus tracking, and role-based access mapped to the company hierarchy.

EXPERIENCE

System Developer

May 2026 – Present

H. M. Al Rugaib & Sons Trading Co.

Khobar · Part-time

- Built a quotations module that writes directly into Microsoft Dynamics 365 production and produces VAT-correct bilingual PDFs with product photos.
- Took the Tabby buy-now-pay-later gateway from sandbox to production in Dynamics 365 by owning the integration end to end with Tabby's team.

Freelance Software Engineer

Mar 2026 – Present

Independent client work · taking inherited apps through to store submission

Remote

Journey Joy (rebranded Rifqah for the 2.x release), campus ride-hailing platform: Node/Express + MySQL backend, React admin panel, Flutter driver and passenger apps · Jul 2026 – Present

- Took the platform from an inherited English-only, partly integrated codebase (v1.x apps already on the App Store and Google Play) to a 2.x release candidate now with the owner's team for store submission, with the backend and admin panel changes below already in production.
- Removed four vulnerabilities from the platform: a MASTER_OTP login backdoor that let one universal code sign in to any account, two broken-object-level-authorization (IDOR) flaws and an unauthenticated path traversal.
- Purged 43 customers' personal data from git history with a verified rewrite, then added per-IP and per-account rate limiting, HMAC verification on Paymob callbacks, presigned S3 reads and a pre-commit secret scanner.

System Developer Intern

Jan – May 2026

H. M. Al Rugaib & Sons Trading Co.

Khobar

- Cut catalog load time from 10–15 s to under 3 s on a 160,000-item catalog by tuning queries, adding caching and moving heavy work to scheduled jobs.
- After testing showed regular staff could open manager-only screens, closed them by designing role-based access control mapped to the company hierarchy.

Logistics & Operations Team Lead

Sep 2025 – Present

KFUPM Cybersecurity Club

Dhahran

- Kept the club's workshops, competitions and events on schedule by running their logistics and automating routine tasks with Python.

Lab Assistant

Jan – Aug 2025

KFUPM College of Computing & Mathematics

Dhahran

- Cut manual scheduling errors by 40% with a Python/Tkinter room scheduler that detects conflicts; cut a 2-hour feedback-delivery task to 15 minutes with a Power Automate and Excel workflow.

TECHNICAL SKILLS

Security	Web penetration testing, bug bounty reconnaissance, vulnerability assessment, OWASP Top 10 and WSTG, secure code review, RBAC · Burp Suite, OWASP ZAP, Nmap, Metasploit, ffuf, sqlmap, subfinder, amass, httpx, nuclei, Wireshark, Scapy, Kali Linux
Languages	Python (PCEP), Bash, Dart, TypeScript/JavaScript, Java, C
Mobile / Dev	Flutter, Dart, Riverpod, REST APIs, Supabase, Node/Express, MySQL, Google Play and App Store release preparation
Systems	Microsoft Dynamics 365, AWS (EC2, RDS, S3), Postman, Power Automate, Git/GitHub, Railway, Vercel, Linux

EDUCATION

B.S. Computer Engineering

Expected December 2026

King Fahd University of Petroleum & Minerals (KFUPM), Dhahran

GPA 3.27 / 4.00 · Second Honors

- QS World University Rankings 2026: #63 worldwide, 1st in the Arab region
- **Relevant coursework:** Computer & Network Security · Operating Systems · Mobile Computing & OS · Data Structures & Algorithms

LANGUAGES

Arabic (native) · English (full professional, IELTS 6.5) · French & Japanese (elementary)
