SCAN → PORTFOLIO

SUMMARY

Flutter developer with two production codebases in daily use: an ERP-backed sales superapp at Al Rugaib and a freelance ride-hailing platform whose apps are on the App Store and Google Play. Computer Engineering senior at KFUPM, graduating December 2026.

EXPERIENCE

System Developer May 2026 – Present
H. M. Al Rugaib & Sons Trading Co. Khobar · Part-time

- Built a quotations module that writes directly into Microsoft Dynamics 365 production and produces VAT-correct bilingual PDFs with product photos.
- Took the Tabby buy-now-pay-later gateway from sandbox to production in Dynamics 365 by owning the integration end to end with Tabby's team.

Freelance Software Engineer Mar 2026 – Present
Independent client work · taking inherited apps through to store submission Remote

Journey Joy (rebranded Rifqah for the 2.x release), campus ride-hailing platform: Node/Express + MySQL backend, React admin panel, Flutter driver and passenger apps · Jul 2026 – Present

- Took the platform from an inherited English-only, partly integrated codebase (v1.x apps already on the App Store and Google Play) to a 2.x release candidate now with the owner's team for store submission, with the backend and admin panel changes below already in production.
- Hardened the inherited Paymob card integration and made it reconcile: charging the booking actually being paid for, a saved-card toggle, subscription cancellation and renewal, and refund reconciliation through the gateway's transaction inquiry, with the server side prepared for Apple Pay behind config.

System Developer Intern Jan – May 2026
H. M. Al Rugaib & Sons Trading Co. Khobar

- Cut catalog load time from 10–15 s to under 3 s on a 160,000-item catalog by tuning queries, adding caching and moving heavy work to scheduled jobs.
- After testing showed regular staff could open manager-only screens, closed them by designing role-based access control mapped to the company hierarchy.

Lab Assistant Jan – Aug 2025
KFUPM College of Computing & Mathematics Dhahran

- Cut manual scheduling errors by 40% with a Python/Tkinter room scheduler that detects conflicts; cut a 2-hour feedback-delivery task to 15 minutes with a Power Automate and Excel workflow.

TECHNICAL SKILLS

Mobile / Dev	Flutter, Dart, Riverpod, REST APIs, Supabase, Node/Express, MySQL, Google Play and App Store release preparation
Languages	Python (PCEP), Bash, Dart, TypeScript/JavaScript, Java, C
Systems	Microsoft Dynamics 365, AWS (EC2, RDS, S3), Postman, Power Automate, Git/GitHub, Railway, Vercel, Linux
Security	OWASP Top 10, RBAC, vulnerability assessment · Burp Suite, Nmap, Wireshark (eJPTv2 certified)

EDUCATION

B.S. Computer Engineering Expected December 2026
King Fahd University of Petroleum & Minerals (KFUPM), Dhahran GPA 3.27 / 4.00 · Second Honors

- QS World University Rankings 2026: #63 worldwide, 1st in the Arab region
- Relevant coursework: Mobile Computing & OS · Data Structures & Algorithms · Intro to AI (A+) · Embedded Systems

CERTIFICATIONS & LANGUAGES

eJPTv2: INE Junior Penetration Tester, earned Jan 2025 · **PCEP:** Certified Entry-Level Python Programmer
Arabic (native) · English (full professional, IELTS 6.5) · French & Japanese (elementary)
