SCAN → PORTFOLIO

SUMMARY

Flutter and Node/Express engineer with two production codebases in daily use: an ERP-backed sales superapp at Al Rugaib (intern, now part-time developer) and a freelance ride-hailing platform whose apps are on the App Store and Google Play. Takes work through to release: payment-gateway integration, deploy scripts, a mocha test suite and the store-submission handover. Computer Engineering senior at KFUPM, graduating December 2026.

EXPERIENCE

System Developer

May 2026 – Present

H. M. Al Rugaib & Sons Trading Co.

Khobar · Part-time

- Built a quotations module that writes directly into Microsoft Dynamics 365 production and produces VAT-correct bilingual PDFs with product photos.
- Took the Tabby buy-now-pay-later gateway from sandbox to production in Dynamics 365 by owning the integration end to end with Tabby's team.
- Kept showroom price tags printing at true physical size by recalibrating the 4-up template across the render templates, server, printers admin page and desktop print agent of the price-tag pipeline, continued from an existing base.
- Caught payment defects before release by running full ERP payment flows and filing prioritized issue reports.

Freelance Software Engineer

Mar 2026 – Present

Independent client work · taking inherited apps through to store submission

Remote

Journey Joy (rebranded Rifqah for the 2.x release), campus ride-hailing platform: Node/Express + MySQL backend, React admin panel, Flutter driver and passenger apps · Jul 2026 – Present

- Took the platform from an inherited English-only, partly integrated codebase (v1.x apps already on the App Store and Google Play) to a 2.x release candidate now with the owner's team for store submission, with the backend and admin panel changes below already in production.
- Hardened the inherited Paymob card integration and made it reconcile: charging the booking actually being paid for, a saved-card toggle, subscription cancellation and renewal, and refund reconciliation through the gateway's transaction inquiry, with the server side prepared for Apple Pay behind config.
- Made the platform usable by Arabic-speaking passengers and drivers by localizing all three surfaces (driver, passenger, admin) with RTL layout, Arabic typography and Arabic district names generated from the platform's live district list.
- Made production deploys repeatable on the existing AWS EC2, RDS and S3 stack with a deploy script, drift check and schema preflight, and wrote the credential-rotation runbook after diagnosing two rotations that never reached the server.
- Took the backend from no test runner to 2,363 passing mocha tests and added a weekly dependency-audit workflow that fails on High or Critical advisories.

System Developer Intern

Jan – May 2026

H. M. Al Rugaib & Sons Trading Co.

Khobar

- Cut catalog load time from 10–15 s to under 3 s on a 160,000-item catalog by tuning queries, adding caching and moving heavy work to scheduled jobs.
- After testing showed regular staff could open manager-only screens, closed them by designing role-based access control mapped to the company hierarchy.
- Grew the internal app from a single SKU-lookup screen into a superapp used daily by 300+ staff across 15 branches by shipping the orders and analytics screens, the bonus-reconciliation cron and the BOM/kit endpoint.
- Kept app and ERP records in agreement by owning Dynamics 365 sandbox/UAT testing and reconciling every payment method before each release.

Logistics & Operations Team Lead

Sep 2025 – Present

KFUPM Cybersecurity Club

Dhahran

- Kept the club's workshops, competitions and events on schedule by running their logistics and automating routine tasks with Python.

- Cut manual scheduling errors by 40% with a Python/Tkinter room scheduler that detects conflicts; cut a 2-hour feedback-delivery task to 15 minutes with a Power Automate and Excel workflow.

PROJECTS

Al Rugaib Sales Platform	MOBILE · PRODUCTION	Journey Joy	RIDE-HAILING · PRODUCTION
Flutter/Dart superapp for H. M. Al Rugaib & Sons: orders, catalog, quotations written into Dynamics 365, analytics, bonus tracking, and role-based access mapped to the company hierarchy.		Node/Express + MySQL backend, React admin panel, Flutter driver and passenger apps; the v1.x apps are on the App Store and Google Play and my 2.x work is in the release candidate. Added since inheriting it: per-driver zone polygons on Google Maps with point-in-polygon matching, an SOS panic button with operator contacts, and 1:1 chat with report and block.	
KFUPM CTF, 3rd place	SECURITY · TEAM LEAD	ML & Data Science	COURSEWORK · KFUPM
Led the team through the web and network exploitation challenges with Wireshark, Metasploit and Nmap.		Vehicle classification with KNN, SVM and MLP over 19 features; heart-disease prediction classifier.	

TECHNICAL SKILLS

Mobile / Dev	Flutter, Dart, Riverpod, REST APIs, Supabase, Node/Express, MySQL, Google Play and App Store release preparation
Languages	Python (PCEP), Bash, Dart, TypeScript/JavaScript, Java, C
Systems	Microsoft Dynamics 365, AWS (EC2, RDS, S3), Postman, Power Automate, Git/GitHub, Railway, Vercel, Linux
Security	OWASP Top 10, RBAC, vulnerability assessment · Burp Suite, Nmap, Wireshark (eJPTv2 certified)

EDUCATION

B.S. Computer Engineering	Expected December 2026
King Fahd University of Petroleum & Minerals (KFUPM), Dhahran	GPA 3.27 / 4.00 · Second Honors
• QS World University Rankings 2026: #63 worldwide, 1st in the Arab region • Relevant coursework: Mobile Computing & OS · Data Structures & Algorithms · Intro to AI (A+) · Embedded Systems	

CERTIFICATIONS

- **eJPTv2:** INE Junior Penetration Tester, earned Jan 2025
- **eWPTX:** INE Web Application Penetration Tester eXtreme, in progress
- **PCEP:** Certified Entry-Level Python Programmer
- CompTIA Security+, Network+, A+ and Cisco CCNA: coursework complete, exams pending

LANGUAGES

Arabic (native) · English (full professional, IELTS 6.5) · French & Japanese (elementary)
