SCAN → PORTFOLIO

SUMMARY

Flutter and Node/Express engineer with two production codebases in daily use: an ERP-backed sales superapp at Al Rugaib (intern, now part-time developer) and a freelance ride-hailing platform live on the App Store and Google Play. Takes work through to release: payment-gateway integration, iOS and Android release engineering, AWS deploys and a mocha test suite. Computer Engineering senior at KFUPM, graduating December 2026.

EXPERIENCE

System Developer

May 2026 – Present

H. M. Al Rugaib & Sons Trading Co.

Khobar · Part-time

- Built a quotations module that writes directly into Microsoft Dynamics 365 production and produces VAT-correct bilingual PDFs with product photos.
- Took the Tabby buy-now-pay-later gateway from sandbox to production in Dynamics 365 by owning the integration end to end with Tabby's team.
- Took over a broken price-tag pipeline and rebuilt it end to end (daily Dynamics 365 price diff over API, bilingual A4 tag sheets at true physical size, desktop print agent) so showroom staff print tags on the spot.
- Caught payment defects before release by running full ERP payment flows and filing prioritized issue reports.

Freelance Software Engineer

Mar 2026 – Present

Independent client work · digital transformation of inherited apps: audits, payment and maps integration, cloud and SQL backends, store release Remote

Journey Joy (rebranded Rifqah for the 2.x release), campus ride-hailing platform live on the App Store and Google Play: Node/Express + MySQL backend, React admin panel, Flutter driver and passenger apps · Jul 2026 – Present

- Took the platform from an inherited English-only, partly integrated codebase to a 2.x release live on the App Store and Google Play by fixing iOS archiving and signing, shipping 2.0.0 and 2.2.0 through App Store Connect and adding a Play-compliant Android release script.
- Let passengers pay by card, saved card and Apple Pay by completing and hardening the inherited Paymob integration: the Apple Pay entitlement, a saved-card toggle, charging the booking actually being paid for, subscription cancellation and renewal, and refund reconciliation through the gateway's transaction inquiry.
- Deliver digital-transformation work on client apps in any state: audit the codebase, integrate payment gateways and maps, move the backend onto AWS and SQL databases, localize, and carry the release to both stores.
- Made the platform usable by Arabic-speaking passengers and drivers by localizing all three surfaces (driver, passenger, admin) with RTL layout, Arabic typography and Arabic district names generated from the platform's live district list.
- Made production deploys repeatable on the existing AWS EC2, RDS and S3 stack with a deploy script, drift check and schema preflight, and wrote the credential-rotation runbook after diagnosing two rotations that never reached the server.
- Took the backend from no test runner to 2,363 passing mocha tests and added a weekly dependency-audit workflow that fails on High or Critical advisories.

System Developer Intern

Jan – May 2026

H. M. Al Rugaib & Sons Trading Co.

Khobar

- Cut catalog load time from 10–15 s to under 3 s on a 160,000-item catalog by tuning queries, adding caching and moving heavy work to scheduled jobs.
- After testing showed regular staff could open manager-only screens, closed them by designing role-based access control mapped to the company hierarchy.
- Grew the internal app from a single SKU-lookup screen into a superapp used daily by 300+ staff across 15 branches by shipping the orders and analytics screens, the bonus-reconciliation cron and the BOM/kit endpoint.
- Kept app and ERP records in agreement by owning Dynamics 365 sandbox/UAT testing and reconciling every payment method before each release.

Logistics & Operations Team Lead

KFUPM Cybersecurity Club

- Kept the club's workshops, competitions and events on schedule by running their logistics and automating routine tasks with Python.

Sep 2025 – Present

Dhahran

Lab Assistant

KFUPM College of Computing & Mathematics

- Cut manual scheduling errors by 40% with a Python/Tkinter room scheduler that detects conflicts; cut a 2-hour feedback-delivery task to 15 minutes with a Power Automate and Excel workflow.

Jan – Aug 2025

Dhahran

PROJECTS

Al Rugaib Sales Platform

MOBILE · PRODUCTION

Flutter/Dart superapp for H. M. Al Rugaib & Sons: orders, catalog, quotations written into Dynamics 365, analytics, bonus tracking, and role-based access mapped to the company hierarchy.

Journey Joy

RIDE-HAILING · PRODUCTION

Live on the App Store and Google Play: Node/Express + MySQL backend, React admin panel, Flutter driver and passenger apps. Added since inheriting it: per-driver zone polygons on Google Maps with point-in-polygon matching, an SOS panic button with operator contacts, and 1:1 chat with report and block.

KFUPM CTF, 3rd place

SECURITY · TEAM LEAD

Led the team through the web and network exploitation challenges with Wireshark, Metasploit and Nmap.

ML & Data Science

COURSEWORK · KFUPM

Vehicle classification with KNN, SVM and MLP over 19 features; heart-disease prediction classifier.

TECHNICAL SKILLS

Mobile / Dev	Flutter, Dart, Riverpod, REST APIs, Node/Express, Supabase, Google Play and App Store release
Languages	Python (PCEP), Bash, Dart, TypeScript/JavaScript, SQL, Java, C
Systems	AWS (EC2, RDS, S3), MySQL, PostgreSQL (Supabase), Microsoft Dynamics 365, Postman, Power Automate, Git/GitHub, Railway, Vercel, Linux
Security	OWASP Top 10, RBAC, vulnerability assessment · Burp Suite, Nmap, Wireshark (eJPTv2 certified)

EDUCATION

B.S. Computer Engineering

King Fahd University of Petroleum & Minerals (KFUPM), Dhahran

- QS World University Rankings 2026: #63 worldwide, 1st in the Arab region
- Relevant coursework: Mobile Computing & OS · Data Structures & Algorithms · Intro to AI (A+) · Embedded Systems

Expected December 2026

GPA 3.27 / 4.00 · Second Honors

CERTIFICATIONS

- eJPTv2: INE Junior Penetration Tester, earned Jan 2025
- eWPTX: INE Web Application Penetration Tester eXtreme, in progress
- PCEP: Certified Entry-Level Python Programmer
- CompTIA Security+, Network+, A+ and Cisco CCNA: coursework complete, exams pending

LANGUAGES

Arabic (native) · English (full professional, IELTS 6.5) · French & Japanese (elementary)
