SUMMARY

Mobile engineer who ships to production. Grew an internal tool into a multi-module Flutter superapp used daily by 300+ staff across 15 branches, cutting catalog loads from 10–15s to under 3s on a 160,000-item catalog, and owned the Tabby payment integration with Microsoft Dynamics 365 end-to-end. Currently building a Flutter app freelance while finishing Computer Engineering at KFUPM.

EXPERIENCE

Freelance Mobile Developer Jun 2026 – Present
Independent Remote

- Building a cross-platform Flutter application end-to-end — architecture, state management, REST/Supabase data layer, and release preparation for Google Play and the App Store.
- Sole developer on the project: owns technical decisions, testing, and delivery.

System Developer May 2026 – Present
H. M. Al Rugaib & Sons Trading Co. Khobar · Part-time

- Built the quotations feature that writes directly into Microsoft Dynamics 365 production.
- Shipped a standalone price-tag package connected via API so showroom staff print tags on the spot, saving hours per employee each month.
- Owned the Tabby payment-platform integration with Dynamics 365 end-to-end — sandbox to production, coordinating with Tabby’s team.
- Ran end-to-end ERP payment testing with prioritized issue reports.

System Developer Intern Jan – May 2026
H. M. Al Rugaib & Sons Trading Co. Khobar

- Worked across a multi-module Flutter app (orders, catalogs, analytics, bonus tracking); cut catalog loads from 10–15s to under 3s on a 160,000-item catalog.
- Grew the internal app from a single showroom tool into a company-wide superapp used daily by 300+ staff across 15 branches.
- Helped design role-based access control (RBAC) mapped to the company hierarchy; investigated and resolved data-integrity issues.
- Owned Dynamics 365 sandbox/UAT feature testing before releases; validated every payment method and reconciled transactions between app and ERP.

Logistics & Operations Team Lead Sep 2025 – Present
KFUPM Cybersecurity Club Dhahran

- Leads logistics and operations for workshops, competitions, and events; automates routine tasks with Python.

Lab Assistant Jan – Aug 2025
KFUPM College of Computing & Mathematics Dhahran

- Built a Python/Tkinter scheduling app with conflict detection that cut manual errors 40%; Power Automate/Excel feedback delivery turned a 2-hour task into 15 minutes.

PROJECTS

AlRugaib Sales Platform MOBILE · PRODUCTION
Production Flutter/Dart superapp used company-wide across 15 branches by 300+ staff.

Journey Joy — Ride-Hailing Platform FULL-STACK · FLUTTER
Inherited a production ride-hailing codebase (Node/Express + MySQL, React admin panel, Flutter driver and passenger apps) and took it to launch, contributing 372 of its 381 commits. Built the fleet, zone-matching and payments subsystems, full Arabic/RTL localisation, and a 21-commit security hardening pass across the platform.
